2016 Best Practices
Air Protection Branch 101

Karen Hays
Chief
Air Protection Branch
Georgia Environmental Protection Division

AAPCA
September 2016
OVERVIEW OF “APB 101”

The Air Protection Branch developed “Air Protection Branch 101” (APB 101) in 2015 to ensure that new associates understand three things:

- The mission of the Air Protection Branch is important. We are all working to improve air quality in Georgia.
- Others within the Air Protection Branch rely on your work.
- There is a lot of opportunity to learn and grow at the Air Protection Branch.
DESCRIPTION OF APB 101

*It’s a simple thing, really*

Half-day training developed entirely in-house
- Begins and ends with remarks from Air Protection Branch Chief
- Short presentation from each program
- Presentations given by managers

Conducted quarterly

Experienced staff invited to attend if space is available
LESSONS LEARNED

One year to develop!

- Some programs didn’t have a basic presentation about their program
- Reassigned project
- In house talent formatted the presentations

Initial sessions were information overload

- Too long and too much detail

Managers benefitting from the practice

Take a break!
EVALUATION PROCESS

Presenters assess each other for content
New staff content value after APB 101
Follow-up one month letter with an additional assessment on impact of APB 101
SUSTAINABILITY, TRANSFERABILITY AND UNIQUENESS

Once developed, easy to sustain
- Schedule quarterly
- Review presentation for updates

Transferability?
- Concept very transferable
- Watershed Protection Branch attended and is developing similar presentation

Unique? NO! Easily adapted to any organization
