Opportunities to Share Information & Streamline Work

- ▶ Examples of common elements that may be shared:
 - ▶ Satellite imagery
 - ▶ Smoke prediction model runs
 - ▶ Information from land management agencies
 - ▶ Any estimation of emissions from each day or each fire
- ▶ Submitted Exceptional Event demonstrations (public comment process complete)
- ▶ Easy access to all EPA concurrences/ approved Exceptional Event demonstrations (examples are available, but not a complete list)

Leveraging EECIP: Project Pages

- ▶ States, locals, tribes, and federal agencies may post documents and project descriptions on project pages.
- ▶ WY DEQ created a project page to share documents related to the 2020 wildfires.
- ▶ [Link to project page](#)

The screenshot displays a web interface for the "2020 Wildfire Exceptional Events Data Collaboration". The page is organized into several sections:

- Project Overview:** This section includes a dropdown menu for "Agency" (currently showing "Wyoming Department of Environmental Quality"), a "Start Year" of 2020, "Year Most Recently Active", "Current Status" (Active), "Record Source" (Agency supplied), "Project URL", and "Last Updated" (Steven Girt 11/9/2021 6:30:14 PM). To the right, there is a "Media" section with an "AIR" icon, a "Likes" section with a thumbs-up icon and the number "1", and a "Program Area(s)" field.
- Project Description:** This section contains the text: "This page is intended to share information and data products from 2020 wildfires for use in development of exceptional event demonstrations."
- Project Files:** This section displays a grid of file thumbnails with their names:
 - HRRR 12Z Vert Integrated Smoke Valid at 3 PM MT.GIF
Example HRRR smoke model 082320
 - NASA Worldview Vis Sat Smoke Aug 23.GIF
NASA Satellite observations of smoke
 - 12Z HRRR Vertically Integrated Smoke 21Z (3 PM MT).GIF

Exceptional Events Demonstrations Data Collaboration

This page is intended to share information and data products for use in the development of exceptional event demonstrations where many states, locals, and tribes may be working on a demonstration regarding the same event (ex. the 2021 wildfires). The information here is intended to enable states, locals, and tribes working on exceptional events demonstrations to collaborate where appropriate to leverage knowledge and resources.

To join this group, please submit a discussion post listing the exceptional events demonstrations you are in the process of completing. If you have any questions you'd like to extend broadly to your colleagues, please post those as well.

If you have questions or need assistance, please contact Kelly Poole at kpoole@ecos.org or 202-266-4939.

Directions:

- To add information - write a post and use the "Browse" button on the bottom right to add files.
- Please include your agency name in the body of your post.
- Be sure to select the "Get notified of replies" option located directly below the "Add Post" button.
- Also, be sure to subscribe to this post via the "subscribe" button in the top right corner of the discussion page. That way you will be notified when your colleagues join the discussion.
- See [this wildfire project page](#) from 2020, for an example of the types of documents that could be shared here.
- An informational slide deck, with directions on how to join a discussion, is included as an attachment to this post. The discussion directions begin on slide 12.

 April Hathcoat posted this 22 hours ago - 66.141.192.2

CNEP currently does not have any exceptional events to report, but I am unable to add the SPeCS for Exceptional Events program service in CDX because our agency information has not been added to the service. I was told at one time (I need to find the documentation) that funding was not available to add this information... has anyone else had this issue?

Thank you!

April H.
